

Review Submission History: Midsem Part II

Assignment Instructions

The dataset provided contains information on phones. The target column is price\_range. It has three categories 0, 1, 2, where 0 is for the cheap phones, 1 is for medium priced phones and 2 is for the expensive phones. Use the dataset to perform the following tasks:

1. Train a K Nearest Neighbors classifier with three different values of K. (5 Marks)
2. Evaluate the three models on the training and test data. (5 Marks)
3. Draw a conclusion on which model is the best, and whether or not it is generalizing well. (5 Marks)
